

# Electricity generated by solar panels in Slovakia

## Overview

---

How much solar power does Slovakia have?

Slovakia has around 472 MW of installed solar PV power generation capacity in 2019. Solar PV is expected to claim 44% of the clean energy capacity needed to generate 2.4 TWh of electricity by 2021. In particular, solar energy provides an important contribution to meet energy needs in the electricity sector.

What is solar photovoltaics in Slovakia?

Slovakia solar photovoltaics is mainly driven by the residential sector. Slovakia has around 472 MW of installed solar PV power generation capacity in 2019. Solar PV is expected to claim 44% of the clean energy capacity needed to generate 2.4 TWh of electricity by 2021.

Should Slovakia invest in solar energy?

Slovakia's nuclear sector already contributes significantly to its clean electricity mix, and further developments in this area would ensure a robust supply of sustainable energy. Moreover, investing in solar energy can complement nuclear power's base load capabilities, offering a balanced and resilient path forward.

Is biomass a viable energy source in Slovakia?

Biomass currently dominates electricity generation from renewables, followed by biogas, solar, and hydropower. Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles.
