

Emergency Energy Storage Mobile Power Supply

Overview

What is green mobile emergency power supply?

HK Electric Introduces Green Mobile Emergency Power Supply
HK Electric has introduced a green mobile electricity supply system to provide customers with reliable and emission-free energy during emergencies. The system, comprising an energy storage truck (EST) and a power changeover truck (PCT), will provide.

What is a mobile energy storage system?

A mobile energy storage system is composed of a mobile vehicle, battery system and power conversion system . Relying on its spatial-temporal flexibility, it can be moved to different charging stations to exchange energy with the power system.

What is a green mobile electricity supply system?

Handover ceremony of the mobile electricity supply system. The green mobile electricity supply system, comprising an energy storage truck (right) and a power changeover truck (left), provides uninterrupted temporary relief when normal power is not available. The energy storage truck has a capacity of 500kWh, equivalent.

What is a mobile energy storage system (MESS)?

During emergencies via a shift in the produced energy, mobile energy storage systems (MESSs) can store excess energy on an island, and then use it in another location without sufficient energy supply and at another time , which provides high flexibility for distribution system operators to make disaster recovery decisions .
