

Energy storage product manufacturing plant in New York USA

Overview

What is the New York battery & energy storage technology consortium?

The New York Battery and Energy Storage Technology (NY-BEST™) Consortium, established in 2010, serves as an expert resource for energy storage-related companies and organizations looking to grow their business in New York State.

What is the Energy Solutions manufacturing center of Excellence?

The Energy Solutions Manufacturing Center of Excellence will enable TMHNA to develop a more diverse portfolio of energy solutions as industry demand for electric products continues to grow.

Why is energy storage important?

To achieve New York's climate goals, it's clear energy storage will play an important role in the electric grid & transportation system of the future. We work to ensure that markets are developed fairly & with an eye towards enabling a clean energy future. Discover more about our history, mission, leadership, and more.

What makes Raymond a great energy facility?

"This facility is a testament to our long, rich history of innovation and developing advanced technologies," said Jennifer Lupo, vice president of energy solutions, supply chain and leasing, The Raymond Corporation.
