

Estimated demand for energy storage projects

Overview

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

What is the future of energy storage?

Global installed energy storage is on a steep upward trajectory. From just under 0.5 terawatts (TW) in 2024, total capacity is expected to rise ninefold to over 4 TW by 2040, driven by battery energy storage systems (BESS). Last year saw a record-breaking 200 gigawatt-hours (GWh) of new BESS projects coming online, a growth rate of 80%.

Should energy storage be developed?

Developing energy storage has become a global consensus. It was announced at COP29 in late 2024 that global storage capacity will increase to 1,500 GW by 2030, more than six times the 2022 level. As a result, InfoLink maintains a cautiously optimistic outlook for the medium- to long-term development of energy storage systems.

How has cost decline impacted energy storage?

This trend may highlight that the cost decline over the past few years has driven energy storage into an era of accelerated diversification in the global market. The European energy storage market added 19.1 GWh of installed capacity in 2024, up 12.4% YoY, with drastic changes in the ESS landscape throughout the year.

Estimated demand for energy storage projects

[Global Energy Storage Growth Upheld by New Markets](#)

Jun 18, 2025 · The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

[Global installed energy storage capacity by ...](#)

Apr 25, 2024 · Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

[Global energy storage market: review and outlook](#)

Jan 24, 2025 · The global energy storage market added 175.4 GWh of installed capacity in 2024, with the three major regional markets--China, the Americas, and Europe--continuing to ...

[\(PDF\) Projected Global Demand for Energy Storage](#)

Feb 6, 2024 · The WEO 2022 projects a dramatic increase in the relevance of battery storage for the energy system. Battery electric vehicles become the dominant technology in the light-duty ...

[How BESS and Lithium Demand Are Shaping ...](#)

2 days ago · Analysts estimate that BESS will account for about 30% of global lithium demand by 2026, rising to 36% by 2030. Global lithium ...

[Global energy storage](#)

Feb 27, 2025 · To support the global transition to clean electricity, funding for development of energy storage projects is required. Pumped hydro, batteries, hydrogen, and thermal storage ...

[173GWh! Projections for Global Energy ...](#)

Apr 3, 2024 · Based on Trendforce's global ESS installation database, the forecast indicates that global energy storage new installations will surge ...

Global installed energy storage capacity by scenario, 2023 ...

Apr 25, 2024 · Global installed energy storage capacity by scenario, 2023 and 2030 - Chart and data by the International Energy Agency.

Energy Storage Outlook

May 25, 2025 · Global installed energy storage is on a steep upward trajectory. From just under 0.5 terawatts (TW) in 2024, total capacity is expected to rise ninefold to over 4 TW by 2040, ...

How BESS and Lithium Demand Are Shaping Energy Storage: ...

2 days ago · Analysts estimate that BESS will account for about 30% of global lithium demand by 2026, rising to 36% by 2030. Global lithium demand in lithium-carbonate-equivalent (LCE) ...

Energy Storage Rides a Wave of Growth but Uncertainty ...

Mar 7, 2025 · The rapid growth in the energy storage market continues to drive demand for project financing, and like any other project-financed asset class, lenders will analyze both the ...

[173GWh! Projections for Global Energy Storage](#)

Apr 3, 2024 · Based on Trendforce's global ESS installation database, the forecast indicates that global energy storage new installations will surge to 74GW/173GWh in 2024, marking a ...

[Projected Global Demand for Energy Storage, SpringerLink](#)

Feb 6, 2024 · This chapter describes recent projections for the development of global and European demand for battery storage out to 2050 and analyzes the underlying drivers, ...

[\(PDF\) Projected Global Demand for Energy ...](#)

Feb 6, 2024 · The WEO 2022 projects a dramatic increase in the relevance of battery storage for the energy system. Battery electric vehicles become ...
