

# **Exchange of Pakistani Mobile Energy Storage Containers for Farms**

## Overview

---

What drives Pakistan's energy transition?

Renewables adoption is often driven by government programmes or utility tenders, but Pakistan's energy transition is almost entirely private sector-led.

How can a solar-plus-battery system make Pakistan more inclusive?

Pakistan is experiencing an energy revolution as households and businesses rapidly adopt solar-plus-battery systems to meet their own energy needs. Making this transition more inclusive will require financing mechanisms that lower costs for underserved users and support grid upgrades for all.

How much solar energy did Pakistan import in 2024?

In 2024, Pakistan imported 17 gigawatts (GW) of solar photovoltaic (PV). The country also imported an estimated 1.25 gigawatt-hours (GWh) of lithium-ion battery packs in 2024. These are substantial additions to an energy system with approximately 40 GW of total installed capacity.

What is the Pakistan distributed solar project?

The Pakistan Distributed Solar Project already uses a GCF-backed guarantee to finance 43 megawatts of solar PV installations for households, agribusinesses and small- and medium-sized enterprises.

## Exchange of Pakistani Mobile Energy Storage Containers for Farms
