

# **Factory Energy Storage Factory Construction Plan**

## Overview

---

When did Tesla start building a megafactory?

Construction began May 23 on the Megafactory, which is Tesla's first energy storage project outside its US home market. Shanghai Lingang Economic Development Group became the first customer in China for the factory's product, Megapack, and signed a contract with Tesla for the first orders at the groundbreaking ceremony in May.

What is the future of energy storage?

The mass production of these units is expected to start next year with an initial output of 10,000 units annually, equal to around 40 GWh of energy storage. The future of renewable energy relies on large-scale energy storage. The Shanghai Megafactory, Tesla's first energy storage facility outside the US, covers approximately 200,000 square meters.

Will Tesla's Shanghai megafactory reshape energy storage?

The rapid construction and future operations of Tesla's Shanghai Megafactory are poised to reshape the landscape of energy storage solutions. From breaking new ground in international expansion to setting ambitious production goals, Tesla's latest project promises to fortify its global presence and enhance its manufacturing prowess.

What is Tesla's first energy storage facility outside the US?

First Energy Storage Facility Outside the U.S. The Shanghai Megafactory will mark a pivotal step for Tesla as its first energy storage production site outside of the United States. This venture highlights the company's strategy to extend its influence and capabilities beyond traditional automotive manufacturing.

## Factory Energy Storage Factory Construction Plan
