

Factory price d curve breaker in Hungary

Overview

What is the producer price index in Hungary?

In Hungary, the Producer Price Index measures the average change in price of goods and services sold by manufacturers and producers in the wholesale market during a given period.

How has the Hungarian Imbalance Market changed since Q4 2022?

Since the beginning of the Energy Crisis, specifically from Q4 2022, the Hungarian Imbalance Market has seen some interesting and extreme developments. This has created challenges for MAVIR (the Transmission System Operator) to maintain grid stability using traditional flexibility providers from natural gas units.

Are dual prices a problem in Hungary?

It is also worth mentioning the huge spread between the dual prices during scarcity periods (like in the Netherlands) are not likely to appear, as only the activation costs of the eventual system direction feed into the imbalance formula in Hungary.

How did Hungarian economy perform in the 1st quarter of 2025?

The performance of the Hungarian economy in the 1st quarter of 2025 was identical with the same period of the previous year's level. Increasing performance in the service sector as well as the growth in consumption had a positive impact on the GDP.
