

# Find Micro Inverters

## Overview

---

Where is a microinverter located?

Microinverters are also located on your roof, making maintenance more difficult (and costly if your warranty doesn't cover labor). Alternatively, string inverters typically sit more conveniently on the side of your house.

What is a microinverter solar inverter?

Microinverters are a type of solar inverter technology installed at each panel. Microinverters offer many benefits, such as rapid shutdown capabilities, flexibility for panel layouts, and panel-level monitoring and diagnostics. Microinverters are typically more expensive than traditional string inverters.

Where should a microinverter sit on a solar panel?

Alternatively, string inverters typically sit more conveniently on the side of your house. Clipping refers to power losses associated with microinverters and is an important consideration when shopping for a solar panel system. Often, the power output rating of your microinverter is lower than that of the panel itself.

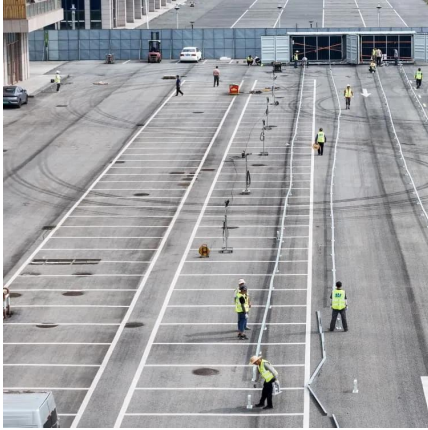

Is eco-worthy micro-inverter a good choice?

Eco-Worthy micro-inverter is a very stable and reputable inverter it's ranked #4 in best sellers rank in the Solar & Wind Power inverters, you can't go wrong buying this inverter. For this micro-inverter to produce efficient results, it's necessary to pair it with a 600W solar panel.
