## Overview

---

What are flow batteries?

Advances like high-performance materials, machine learning, and automation advance flow batteries, a type of rechargeable battery that uses two liquid electrolytes to store energy. By utilizing nanomaterials in the construction of electrodes and membranes, flow batteries achieve higher power densities and longer lifetimes.

Why is the flow battery market growing?

With the increasing adoption of renewable sources of energy, namely solar and wind, the demand for batteries has increase, which in turn has affected the growth of the flow batteries market. This trend is set to continue all around the globe with green energy targets set up by various developed and developing countries.

Who are the key players in the global flow battery market?

The key players in the global flow battery market are Enervault, Imergy Power Systems, Primus Power, Prudent Energy, EnSync Energy Systems, Redflow - sustainable Energy Storage, Sumitomo Electric, Aquion Energy, Redflow Limited, Smart Energy, EnSync Energy Systems, UniEnergy Technologies, VIONX Energy Corporation, and VoltStorage GmbH.

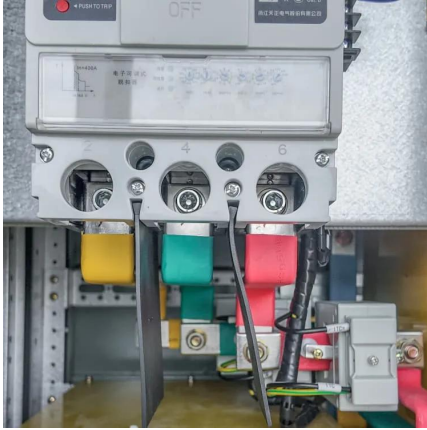

Where do flow battery startups work?

Based on the heat map, we see high startup activity in the USA, followed by the UK and Germany. These flow battery startups work on solutions ranging from grid-scale energy storage and novel battery materials to battery recycling and organic flow batteries.
