

Flywheel Energy Storage Group Standard

Overview

On April 10, 2020, the China Energy Storage Alliance released China's first group standard for flywheel energy storage systems, T/CNESA 1202-2020 "General technical requirements for flywheel energy storage systems." When will flywheel energy storage standards be released?

The group agreed that the standard should be released as soon as possible, and recommended further improvements of standards to support flywheel energy storage systems. Following final approval by the Alliance Standards Committee, CNESA officially released the standard on April 10, 2020.

What is China's first group standard for flywheel energy storage systems?

On April 10, 2020, the China Energy Storage Alliance released China's first group standard for flywheel energy storage systems, T/CNESA 1202-2020 "General technical requirements for flywheel energy storage systems."

What is a flywheel standard?

The standard is designed in accordance with domestic and international flywheel standard conventions, while also referencing related electrochemical energy storage system standards.

What is the Cnesa flywheel energy storage standard?

Following final approval by the Alliance Standards Committee, CNESA officially released the standard on April 10, 2020. The "General technical requirements for flywheel energy storage systems" standard specifies the general requirements, performance requirements, and testing methods for flywheel energy storage systems.
