Overview

Can foldable containers improve logistics management?

Capacity Improving Logistics Management Using Foldable/Collapsible Containers: A Case Study G 179 G constraints in ports for storing and repositioning empty standard containers are major concerns in the logistics and port industry. As an alternative, foldable containers have been introduced into the market.

Are foldable containers a viable solution to repositioning empty containers?

The industry perceives that foldable containers can generate numerous benefits such as reductions in capacity constraints at loading centres and storage, reduction in port infrastructure expansion costs and large benefits to the shipping industry by way of providing a direct solution to the problem of repositioning empty containers.

Do foldable Containers save shipping costs?

Konings and Thijs (2001) argue that, on shipping routes with permanent trade imbalances, the use of foldable containers can save transport, transshipment and storage costs as shipping lines responsible for repositioning their empty containers currently bear the cost of repositioning.

Are foldable containers a good investment?

Foldable containers are considered to be a good investment in the logistics industry. One of survey respondents suggested that 'the foldable container can reduce space constraints on seaport and logistics companies and reduce container handling time in port terminals'.
