

French energy storage new energy magnetic pump

Overview

Does Q energy France support large energy storage systems on industrial sites?

“This power plant is fully in line with a development model that we strongly support: the installation of large energy storage systems on industrial sites,” said Corentin Sivy, Development Director of Q ENERGY France.

Will ABN AMRO be the largest battery energy storage system in France?

Dan Dorner, Chief Commercial Officer Corporate Banking said: “We are happy to have supported this landmark project, which will become the largest battery energy storage system in France upon its completion. This marks ABN AMRO’s first BESS transaction in France, and builds upon our broader BESS and renewable energy track record.

Why are permanent magnet machines used for Fes?

Permanent magnet machines are commonly used for FESs because of their high efficiencies, high power densities, and low rotor losses . The FES capacity is proportional to its mass and the square of speed . Its efficiency relies on the energy storage usage time.

Does France's energy transition plan align with French energy transition goals?

Christophe Léonard, Managing Partner for France at TagEnergy, highlighted the project’s alignment with France’s energy transition goals: “ The trajectory outlined in France’s Multi-Annual Energy Plan, currently under public consultation, calls for a 2.5-fold increase in wind capacity and a 4-fold increase in solar capacity by 2035.
