

Ghana Post Solar Air Conditioning

Overview

How are solar PV systems used in Ghana?

tems have been installed in Ghana. These are being used for inter alia, lighting, water pumping, powering of computers for the teaching and learning of ICT and vaccin refrigeration across the country. Over 70,000 solar lanterns have been disseminated. Stand-alone solar PV systems are market driven in Ghana, spurred by government and donor support.

How much electricity does a split-type air-conditioner use in Ghana?

Survey conducted in some public and commercial buildings in Ghana has gathered that for a standard office cooling (30 m² floor space), a single unit split-type air-conditioner consumes on the average about 2500–2850 kWh of electricity per year, for only daytime office use between the hours of 8:00 am–6:00 pm.

Can a solar powered air conditioner save electricity?

A study was conducted by Liu et al. (2017), on the performance of a quasi-grid-connected photovoltaic DC air conditioner in the hot summer zone in Beijing, China. They found out that solar powered air conditioner can conserve grid electricity by more than 67% during summer daytime and by 40–78% during an entire day.

Are air-conditioning equipment/systems energy consuming?

Air-conditioning equipment/systems are the largest energy consuming devices in the offices of public and commercial buildings in hot-humid climates or relatively high atmospheric temperature countries/regions (Al-Ugla et al., 2016, Aguilar et al., 2014).
