

Ghana solar container communication station

Overview

Can solar PV/fuel cell hybrid system power telecom base stations in Ghana?

This study investigates the viability of deploying solar PV/fuel cell hybrid system to power telecom base stations in Ghana. Furthermore, the study tests the proposed power system resilience by comparing its technical, economic, and environmental performance to PV/diesel and diesel power systems.

Can a solar PV/fuel cell hybrid power a remote telecom base station?

This study has investigated the possibility of deploying a solar PV/Fuel cell hybrid system to power a remote telecom base station in Ghana. The study aims to lower the levelized cost of electricity (LCOE) and reduce greenhouse gas emissions produced from the hybrid power system.

How much does a PV system cost in Ghana?

These suppliers and installers have been granted a permit from the Energy Commission of Ghana to supply and install PV systems. Per the data obtained in , the average cost of PV panels with accessories was estimated at 745 USD/kW. A 10% margin for installation was added, increasing PV capital cost to 820 USD/kW.

Can Ghana decarbonize the telecom sector?

Also, it is supported by Ghana's Renewable Energy Act 832, which promotes the utilization of locally available renewable energy resources to cut down greenhouse emissions (Government of Ghana, 2011). This is a potential footprint for Ghana towards decarbonization for the telecom sector across the country.
