

High-end energy storage projects in North America

Overview

How many energy storage projects does Engie have in North America?

Today, ENGIE has 3 grid-scale energy storage projects in North America with the capacity to deliver 520 MW of power to the grid and another 2 GW under construction. These projects support the growing demand for renewable energy and enable greater reliability and resilience on power grids, while enabling the net zero energy transition.

Which energy storage project uses lithium-ion battery storage technology?

The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2019 and will be commissioned in 2021. The project is owned and developed by Florida Power & Light. Buy the profile here. For more details on the latest energy storage projects, buy the project profiles here.

What is the thermal energy storage battery storage project?

The thermal energy storage battery storage project uses others storage technology. The project was announced in 2017 and will be commissioned in 2024. 2. Morro Bay Battery Energy Storage System.

What is Daggett solar power facility – battery energy storage system?

The Daggett Solar Power Facility – Battery Energy Storage System is a 450,000kW lithium-ion battery energy storage project located in San Bernardino, California, the US. The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2019 and will be commissioned in 2024.
