

# High power inverter with battery

## Overview

---

Which inverter is best for home backup power?

With its customizable battery and stability it is best solution of home backup power. Max low voltage system work effectively by mutual integration of Max 6i and Max 5b models. Max 6i module of the inverter is able to properly utilize solar power (up to 6kW) and transfer power with a high DC/AC ratio (up to 190%).

What is a hybrid inverter?

A hybrid inverter is essentially two inverters in one. It combines a solar inverter and a battery inverter into one simple unit. These advanced inverters use solar energy to power your home, charge a battery, or send excess energy into the electricity grid. Most hybrid inverters can also provide emergency backup power during a blackout.

How does a max low voltage inverter work?

Max low voltage system work effectively by mutual integration of Max 6i and Max 5b models. Max 6i module of the inverter is able to properly utilize solar power (up to 6kW) and transfer power with a high DC/AC ratio (up to 190%). The Max 5b battery (5kWh capacity, expandable up to 50kWh) collects solar energy and backup power during blackouts.

What is a battery inverter?

A battery inverter, also known as a DC to AC inverter, converts the direct current (DC) stored in a battery into alternating current (AC), which is the type of current typically used in homes, businesses and industry. Battery inverters are therefore essential for making use of stored solar power.
