

High-pressure financing for folding containers used in water plants

Overview

Why is blended finance important for water-related investments?

“Blended finance has the potential to attract additional commercial finance for water-related investments as well as act as a market building instrument to provide a bridge from reliance on concessional financing towards more self-sustaining financing approaches.” Water-related investments are key for sustainable development and inclusive growth.

Can sustainable finance help build water systems?

By addressing these challenges, sustainable finance instruments can unlock the capital needed to build water systems that are not only climate-resilient but also economically and socially transformative.

How much commercial finance is mobilised for water and sanitation?

BLENDED FINANCE MECHANISMS AND INSTRUMENTS The amount of commercial finance mobilised by blended finance for water and sanitation is limited compared to other sectors (Figure 2). Only 1.36% (USD 2.14 billion) of total private finance mobilised from 2012-2017 (USD 157.2 billion) was mobilised in the water and sanitation sector.

What is the Roundtable on Financing Water?

WHO-UNICEF (2017), Progress on drinking water, sanitation and hygiene: 2017 update and SDG baselines. The Roundtable on Financing Water, an initiative of the OECD, the World Water Council, the Netherlands and the World Bank, provides a unique forum to catalyse engagement with the water and finance communities.
