What is a DIN rail-mount miniature circuit breaker?

DIN rail-mount miniature circuit breakers are low current rating devices that mount on DIN rails to protect low-power equipment from current overloads and short circuits. Also known as IEC miniature circuit breakers, modular DIN rail breakers, or dual-rated UL and IEC breakers, they save space in panelboards and load centers.

What is a supplemental circuit breaker?

Also known as supplemental protectors, these circuit breakers mount directly to DIN rail downstream from a branch circuit breaker to protect a single piece of equipment. Add ground fault protection to a circuit to minimize the risk of electric shock to workers and equipment if there is a current leak.
