

Home battery storage for sale in Auckland

Overview

Why is battery storage important in New Zealand?

Battery storage, from household to utility-scale batteries and within electric vehicles, is a game changer in the energy transition. Solar penetration is still low in New Zealand but it is growing quickly and if we want to make the most of it we need to capture and store it to be used when the sun isn't shining and when demand is at its highest.

Is installing a home battery in NZ worth it?

Installing a home battery in NZ can absolutely be worth it—especially if: But it's not for everyone. Before making the investment, get a quote from a trusted solar installer, check your electricity usage patterns, and compare energy plans that support battery optimisation (like Octopus, Contact, or Mercury).

Why should you use a battery storage system?

Our battery storage systems help you save on power bills, maximise solar energy use, and ensure backup power when needed. Lower Energy Costs – Store solar power for use anytime. Reliable Backup – Keep essentials running during outages. Safe & Efficient – Lithium Iron Phosphate technology for durability. Cut Costs – Reduce peak electricity charges.

How much does a battery storage system cost?

LG's battery storage systems come with a 10-year warranty. Sizes Available: 6.5, 9.8, 13.1kWh Price Estimate: Approx \$9000-\$15,000 depending on size, installation extra Hybrid battery models are great for seamlessly integrating a battery into either a new or existing solar panel system.
