How big should a solar inverter be?

To account for power losses assume an 80 percent efficiency. Your solar inverter should have a similar or slightly higher wattage rating than the DC output of your solar panels (which in this case is 4.5 kW). You can size it between 1.15 and 1.5 times larger. The rule of thumb is to size your inverter 1.25 bigger than your solar array.

What is the inverter size calculator?

The Inverter Size Calculator is a valuable tool for determining the appropriate inverter size based on your power needs and electrical load. It is widely used in selecting inverters for residential, commercial, and solar applications, ensuring that the inverter's capacity matches the required energy demands efficiently.
