

How many power base stations are there in Tajikistan

Overview

How many hydropower plants are there in Tajikistan?

Currently, there are 11 large and medium hydropower plants in the Republic of Tajikistan and nearly 300 small hydro power plants with total capacity of 132 MW. In 2009 we adopted the updated program for the construction of small hydropower plants. The program envisages the construction of 189 sHPPs with total capacity of 103.6 MW.

What is the power system of Tajikistan?

In Tajikistan, the power system has a total installed capacity of 5190 MW, with 93.9% (or 4973.142 MW) coming from hydro power plants. The remaining 6.1% (or 318 MW) comes from thermal power plants.

How much electricity is generated in Tajikistan?

Annual electricity generation in the Tajik energy system, consisting mainly of hydro power plants, is 16.5 billion kWh. It should be noted that more than 98% of electricity in Tajikistan is generated by hydropower plants, including 97% - by large and medium HPP.

What is the share of thermal power plants in Tajikistan?

The share of thermal power plants is 318 MW or about 6.1%. Annual electricity generation in the Tajik energy system, consisting mainly of hydro power plants, is 16.5 billion kWh. It should be noted that more than 98% of electricity in Tajikistan is generated by hydropower plants, including 97% - by large and medium HPP.
