How much does a storage tank cost?

Storage tank costs are tabulated in this data-file, averaging \$100-300/m<sup>3</sup> for storage systems of 10-10,000 m<sup>3</sup> capacity. Costs are 2-10x higher for corrosive chemicals, cryogenic storage, or very large/small storage facilities. Some rules of thumb are outlined below with underlying data available in the Excel.

How much does a commercial lithium battery energy storage system cost?

In 2025, the typical cost of a commercial lithium battery energy storage system, which includes the battery, battery management system (BMS), inverter (PCS), and installation, is in the following range: \$280 - \$580 per kWh (installed cost), though of course this will vary from region to region depending on economic levels.

How much does underground gas storage cost?

Storage costs are lowest for underground gas storage, with a median \$0.4/m<sup>3</sup> of storage capacity. The key reason is scale. The average facility in our database can store over 1bcm of gas. Methodology.

Why are LNG storage tanks so expensive?

LNG storage tanks thus come in as some of the most expensive storage facilities in the data-file, because they are very large and cryogenic. Higher capex may be worthwhile to install higher grade tanks that minimize boil-off and improve energy efficiency.
