

How much does the solar container energy storage system cost in North America

Overview

How much does solar energy storage cost?

Adding solar energy storage typically costs between \$12,000 and \$20,000. For example, a Powerwall battery costs about \$15,500 fully installed by Tesla, whereas a Panasonic EverVolt battery would be closer to \$18,000.

How much does the energy storage system cost?

The energy storage system is a 4MW, 32MWh NaS battery consisting of 80 modules, each weighing 3 600 kg. The total cost of the battery system was USD 25 million and included USD 10 million for construction of the building to house the batteries (built by Burns & McDonnell) and the new substation at Alamito Creek.

Will additional storage technologies be added?

Additional storage technologies will be added as representative cost and performance metrics are verified. The interactive figure below presents results on the total installed ESS cost ranges by technology, year, power capacity (MW), and duration (hr).

What is the energy storage Grand Challenge?
