

# **How to open the battery cabinet when the battery is out of power**

## Overview

---

Can a key fob open the trunk if the battery is dead?

The electronic components within your car, including the receiver for the key fob signal, are inactive without battery power, rendering the key fob's trunk release button unusable. Therefore, even if the key fob's battery is functioning, it will not be able to open the trunk if the car's battery is dead.

How do you open a dead battery on a Honda CR-V?

Once the car is running, try using the interior trunk release button or the key fob to open the trunk. Remember to follow jump-starting safety procedures carefully to avoid damaging either vehicle. Always connect the jumper cables in the correct order: Positive (+) cable to the positive terminal of the dead battery.

How do I replace a dead battery in a safe?

Each type of safe requires a different method of replacing the dead batteries: Digital lock with override key - You will need to use the override key to open the safe. The battery pack is inside the door and batteries can only be replaced with the safe open. To access the override lock, there is usually a removable panel to the side of the keypad.

Can I access my trunk if my car battery is dead?

Discovering a dead battery is never a pleasant experience, especially when you need something from your trunk. This situation can be frustrating and time-consuming if you are unprepared. Thankfully, there are several methods you can employ to access your trunk even when your car battery is completely dead.
