

How to replace the mobile base station battery

Overview

Do I need to replace my base station's batteries?

If you're not certain which system you have, see the [Which Version of the SimpliSafe® System Do I Have](#) article. You will likely never need to replace your Base Station's batteries as they are rechargeable and meant to last. The Base Station takes four (4) 1.2V, 1300mAh nickel-metal hydride (NiMH) rechargeable batteries.

How many batteries does the base station take?

The Base Station takes four (4) 1.2V, 1300mAh nickel-metal hydride (NiMH) rechargeable batteries. Regular alkaline batteries should never be inserted into the Base Station, as they may damage the device. Once you have acquired the necessary NiMH rechargeable batteries, you can follow the steps below to replace them:.

How do you replace a mobile phone battery?

Set the battery eliminator between 3.7 to 4.2 Volts DC. Attach the battery to a battery eliminator (follow the user manual). Charge for 5-10 minutes. Place the battery back into the phone and check if it powers ON. Replacing or repairing your mobile phone battery can extend the life of your device and improve its overall performance.

Can a phone battery be replaced?

Don't despair, though — while modern cellphones don't come with removable batteries anymore, you can still get a replacement quite easily. The easiest way to replace your smartphone battery is to visit the brand's nearest service center or mail in your device.
