

# **Huawei Industrial Park Energy Storage Project**

## Overview

---

What's new in Huawei's Innovation Park?

First, the new planning philosophy guides the top-level design of the innovation park. These include Huawei's latest three-dimensional transformation methodology (energy, zero-carbon, and digital transformation) and the four-flow integration value system (energy, carbon emissions, information, and value flows).

What is Huawei's energy transformation strategy?

These include Huawei's latest three-dimensional transformation methodology (energy, zero-carbon, and digital transformation) and the four-flow integration value system (energy, carbon emissions, information, and value flows).  
Second, the park enjoys a compact but complete new energy supply system. This enables source-grid-load-storage synergy.

What technology does the park use?

It uses Huawei's latest Wi-Fi 6 for full wireless coverage and has also deployed a digital platform to collect, access, and manage all of the park's data. Founded on innovation, the park has intelligence at its core, including smart energy, zero-carbon, and park management.

What technology is used in a Energy Park?

The park also adopts advanced information technologies, such as the energy Internet, big data, and a cloud service platform to manage, dispatch, and transact energy across supply, transmission, and consumption.
