

Hungarian telecommunications BESS power station wholesale solar container price

Overview

A 1MWh system: Costs between €695,000 and €850,000. Larger systems, like 5MWh, cost €3.5 million to €4 million, benefiting from economies of scale. Does Hungarian law support co-located Bess systems?

While the concept of electricity storage was introduced into Hungarian law earlier, comprehensive policies to support the deployment of co-located BESS systems were lacking.

Does Hungary have a regulatory framework for co-located Bess projects?

Historically, Hungary's regulatory framework did not provide clear guidelines for the integration of co-located BESS projects. This lack of specific regulation created uncertainty for investors and developers, hampering the widespread adoption of these energy storage solutions.

What is the Hungarian Electricity Act 2025?

The Hungarian Electricity Act was amended in early 2025 to include regulations concerning the shared use of producer lines and grid connection points by multiple power plants or BESS systems, each with a nominal capacity of at least 0.5 MW and owned by different entities.

Are co-located Bess systems under-regulated?

Until now, however, the co-located BESS systems have been under-regulated and the numerous divergent and grey-zone practices have created uncertainty in the market, hindering the development of such systems. The changes introduced last week finally clarify and establish key steps for such developments.

Hungarian telecommunications BESS power station wholesale solar

[MET GROUP INAUGURATES LARGEST BESS IN HUNGARY](#)

As of most recent estimates, the cost of a BESS by MW is between \$200,000 and \$450,000, varying by location, system size, and market conditions. This translates to around \$200 - \$450
