

Installation of solar panels on iron tile roof

Overview

How do I install solar panels on a lightweight tile roof?

The best way to install solar panels on a lightweight tile roof is through a method called inset solar installation, also known as a “comp-out” installation. This technique removes the section of tile where the solar panels will be installed and replaces it with composite shingles before mounting the solar array.

How do I install a roof-integrated solar panel?

Roof-integrated solar panel installation is a simple process with Marley SolarTile® - just secure the fixings, place the first tile, push-fit additional tiles and then attach final fixings and flashings.

Can solar panels be installed on a tiled roof?

Solar panels can be installed on a tiled roof in three ways: by installing solar tiles directly onto the roof or by attaching panels using mounting brackets. Most people install solar systems on their existing houses ('retrofit') using this method.

Should you install composite shingles under solar panels?

By removing tiles and installing composite shingles underneath the solar panels, this method eliminates the risk of cracking tiles during installation or in the future. It also prevents damage to the underlayment, which is critical for waterproofing.
