

# **Installation specification and standard of battery cabinet in computer room**

## Overview

---

What are the requirements for a battery room?

Battery room walls and floor shall be made of concrete construction. Battery rooms shall be provided with enclosed and gasketed (i.e., vapor tight) corrosion resistant lighting fixtures as specified in SAES-P-123. Battery room lighting shall be installed to provide a minimum level of illumination of 30-ft candles (300 lux).

What should be included in a battery room?

Cabinets or racks shall be provided in the battery room for storing maintenance tools and safety equipment. These cabinets and racks shall be acid or alkaline resistant as applicable. Battery rooms shall be vented to the outside air by forced ventilation to prevent accumulation of hydrogen and to maintain design temperature.

What should be inspected for incoming battery room equipment?

Incoming Battery room Equipment shall be visually inspected for damage / defects occurred during transportation and conformance to all applicable requirements. Battery room Equipment shall be new and unused.

How do I connect a battery cabinet to a power system?

Procedure 1. Furnished with the battery cabinet are battery disconnect circuit breaker alarm lead assemblies. Refer to the power system installation manual to use these alarm leads to connect the battery cabinet battery disconnect circuit breaker alarm into the power system alarm circuits.
