

# **Investment in power generation and energy storage projects**

## Overview

---

The third quarter of the 2025 calendar year (Q3) saw energy storage projects continue to charge ahead with new records set, while momentum for renewable energy investment activity continued to slow for large-scale electricity generation. What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

Why is energy storage so important?

The skyrocketing demand for energy storage solutions, driven by the need to integrate intermittent renewable energy sources such as wind and solar into the power grid effectively, has led to a flurry of investments in energy storage projects across the country, the NEA said.

How many new energy storage projects are there?

According to NEA's Bian, the government has released a list of 56 new-type energy storage pilot demonstration projects since the beginning of this year, including 17 lithium-ion battery projects and 11 compressed air energy storage projects, among others.

How to promote the implementation of independent energy storage stations?

To promote the implementation of independent energy storage stations, it is necessary to further optimise the electricity market mechanism. segments and targets. Investor participation is beneficial for the development of the energy storage industry.

## Investment in power generation and energy storage projects

---

### **127135,123800 ...**

Nov 20, 2025 · The financing mechanisms for onsite renewable generation, energy storage, and energy efficiency projects include a spectrum of options ranging from traditional to specialized.

### [New Energy Storage Technologies Empower Energy ...](#)

Nov 15, 2025 · In terms of investment and operation, power grid enterprises lack the motivation to invest in energy storage projects as there are settlement problems for non-independent energy ...
