

Investment subsidies for energy storage projects in Gothenburg Sweden

Overview

What is Sweden's largest energy storage investment?

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region.

Is the energy sector a good investment for Sweden?

"Developments in the energy sector present significant opportunities for Sweden," says Joel Görsch, investment advisor, for automotive and mobility at Business Region Göteborg. "The transition from petrol and diesel to electricity has resulted in much of a car's value shifting to its battery.

What projects are financed by green bonds in Gothenburg?

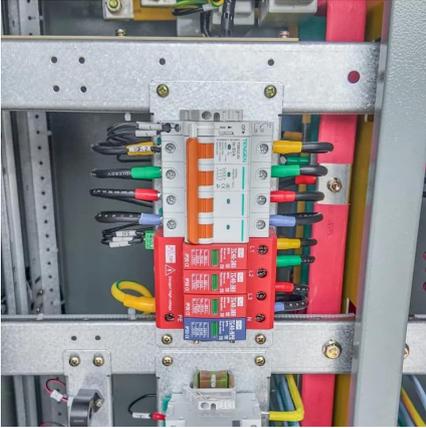

These are just a few of the many projects have been financed in Gothenburg by green bonds: Lackarebäck waterworks and cleaning filters – water treatment using ultrafiltration, using the largest ultrafilter ever built in Scandinavia. GoBiGas – large-scale production of biogas by gasification.

Does Sweden have a CO2 storage facility?

While Sweden currently does not have any operational CO2 storage facilities, studies show that the local geology provides considerable potential for storage sites mainly in the southeast part of the Baltic Sea and southwest Scania. The Swedish government has assigned the SGU to further investigate suitable locations for permanent CO2 storage.

Spillover Effect
So far, Gothenburg's green bonds have supported investments in various climate solutions, including zero-emission electric cars and a biogas project. The biogas facility's capacity is now 20 MWh, which means up to 36,000 tonnes of CO2 emissions can be avoided each year. Another investment is the project CELSIUS, which promotes district heating.
