

Is Tallinn good for solar panels

Overview

How to optimize solar generation in Tallinn Estonia?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Tallinn, Estonia as follows: In Summer, set the angle of your panels to 42° facing South. In Autumn, tilt panels to 61° facing South for maximum generation.

How much energy does a solar PV system produce in Tallinn?

Average 1.54kWh/day in Autumn. Average 0.50kWh/day in Winter. Average 3.97kWh/day in Spring. To maximize your solar PV system's energy output in Tallinn, Estonia (Lat/Long 59.433, 24.7323) throughout the year, you should tilt your panels at an angle of 49° South for fixed panel installations.

What angle should solar panels be installed in Tallinn?

To optimize the efficiency of a solar PV system installed here, it is recommended that panels be tilted at an angle of 49 degrees facing South. However, Tallinn's position within the Northern Temperate Zone presents some challenges for consistent solar power generation throughout the year.

Why should you install solar panels in Estonia?

The energy productivity of solar panels installed in Estonia is equivalent to the southern countries, as Estonia's cooler climate increases the efficiency of solar panels. We offer our customers turnkey construction of a solar park, starting from the design to the connection point, the construction of substations.

Is Tallinn good for solar panels

[Tallinn Solar Photovoltaic Panels](#)

Nov 24, 2025 · What angle should solar panels be installed in Tallinn? To optimize the efficiency of a solar PV system installed here, it is recommended that panels be tilted at an angle of 49 ...

Solar panels

WHY INVEST IN SOLAR PANELS? Investing in solar panels is good for the environment because you consume green energy, but there are four more reasons to invest in renewable energy: ...

[Utilitas is building Tallinn's largest solar park](#)

Nov 28, 2023 · It consists of 15,600 panels and covers a total of 11 hectares in the territory of the former Vão limestone quarry. Double-sided solar panels are combined with single axis ...
