

# **Is it cost-effective to buy solar container outdoor power in Madagascar**

## Overview

---

Is decentralised solar power a cost-effective way to power Madagascar?

A costly expansion of the national electricity grid is a long way off and not the most cost-effective way either. Madagascar is one of the sunniest countries in the world with more than 3,000 hours of sunshine per year, so decentralised solar power supply to rural areas is not only easier but also cheaper.

Does Madagascar have a solar market?

Owing to the large population size and limited access to the grid, Madagascar has a large addressable market for solar solutions with a potential customer base of 2.5 to 5 million households for solar lamps and market-entry solar home systems.

Are solar products taxed in Madagascar?

Solar products have import duty from 5% to 20% and 20% Valued Added Tax (VAT) of the cost of goods. In 2020, the French bank, La Société Générale launched an energy access fund in Madagascar<sup>17</sup>.

Can off-grid solar energy be used in Madagascar?

Recognizing that large parts of the country may remain beyond the reach of the national grid, the government of Madagascar is embracing the potential offered by off-grid solar technologies. Thus, the strategy targets, among other things, the deployment of mini-grids and the extension of off-grid solar energy.
