

Jerusalem solar Glass Enterprise

Overview

What is solar glass?

Mainly engaged in high-quality, high-tech glass deep processing, the products include photoelectric touch glass (monitor front and rear panels and touch screen glass), home appliance glass, photovoltaic glass, and high-end home decoration glass. Solar glass is a glass material that integrates the function of solar power generation.

How big is the Solar Photovoltaic Glass market?

Image © Mordor Intelligence. Reuse requires attribution under CC BY 4.0. The solar photovoltaic glass market size reached 32.10 million tons in 2025 and is forecast to reach 74.75 million tons by 2030, advancing at an 18.42% CAGR between 2025 and 2030.

What is Solar Photovoltaic Glass?

Photovoltaic solar cell glass, also known as solar photovoltaic glass or solar panel glass, is a special glass material used to manufacture solar photovoltaic cell modules. It has transparency and optical properties that allow light to pass through and be absorbed by solar cells to produce electricity.

How will the Solar Photovoltaic Glass market continue to grow?

Competitive strategies range from Chinese producers expanding commodity capacity to Western incumbents investing in circularity, low-carbon furnaces, and specialty coatings. These shifts together position the solar photovoltaic glass market for resilient growth throughout the decade.
