

Latest energy storage policy for North Macedonia power stations

Overview

How is North Macedonia preparing for a green transition?

North Macedonia has made important commitments in its green transition, including the complete phase-out of coal-fired power generation and the deployment of 1.7 gigawatts of renewable energy by 2030, grid and storage investments for energy security and measures to support communities affected by coal transition.

How has the 2022 energy crisis impacted North Macedonia?

The 2022 energy crisis exposed and intensified the vulnerabilities in the energy sector of North Macedonia, revealing the risks of an insufficiently diversified power generation mix and weak regional market integration.

How is North Macedonia governed?

North Macedonia has established institutional, legal, and financial arrangements for elected officials to exercise effective power to govern that are not constrained by non-democratic veto powers or other undue influences. As in many other transition countries, there has long been a close relationship between business and political elites.

Why are low-cost tariffs a problem in North Macedonia?

Below-cost tariffs hinder necessary investments for a greener energy transition and limit competition in the retail market. North Macedonia committed early to decarbonisation, aiming to reduce net • greenhouse gas emissions by 82% by 2030 (compared to 1990 levels).

Latest energy storage policy for North Macedonia power stations

[North Macedonia Archives](#)

Oct 28, 2025 · Zen Energy Group kicks off construction of hybrid PV-BESS project in North Macedonia 15 September 2025 - Zen Energy Group has ...
