

# Latest purchases of flow batteries

## Overview

---

What is the global flow battery market?

On the basis of its application, the global flow battery market can be segmented into power, automotive, residential, industrial, energy storage, and others. The increasing demand for electricity and increased adoption of solar and wind power has seen the power segment hold a larger market share in the global flow battery market.

What is the expected CAGR of the flow battery market?

The global flow battery market size was valued at USD 328.1 million in 2022 and is anticipated to grow at a compound annual growth rate (CAGR) of 22.6% from 2023 to 2030. The rising demand for energy storage systems globally is the primary factor for market growth.

What is a flow battery?

A flow battery is a rechargeable energy storage system where an electrolyte flows through one or multiple electrochemical cells originating from one or more reservoirs or tanks. These batteries are used exclusively in stationery markets and are typically aqueous-based.

Why is the flow battery market growing?

With the increasing adoption of renewable sources of energy, namely solar and wind, the demand for batteries has increase, which in turn has affected the growth of the flow batteries market. This trend is set to continue all around the globe with green energy targets set up by various developed and developing countries.
