

# **Lead Carbon Energy Storage Project**

## Overview

---

Where is the Jidian Energy Valley Lead-carbon Battery Project located?

[Photo provided to gojilin.gov.cn] The Jidian Energy Valley Lead-carbon Battery Project officially began production in the Baicheng Green Energy Industrial Demonstration Park – located in Baicheng, Northeast China's Jilin province – with its first batch of products rolling off the production line on Oct 23.

Are lead carbon batteries better than LAB batteries?

Lead carbon batteries (LCBs) offer exceptional performance at the high-rate partial state of charge (HRPSoC) and higher charge acceptance than LAB, making them promising for hybrid electric vehicles and stationary energy storage applications.

Why are lead-acid batteries so popular?

Learn more. Owing to the mature technology, natural abundance of raw materials, high recycling efficiency, cost-effectiveness, and high safety of lead-acid batteries (LABs) have received much more attention from large to medium energy storage systems for many years.

Does a lead-carbon composite additive prevent LCB sulfation?

Recently, a lead-carbon composite additive delayed the parasitic hydrogen evolution and eliminated the sulfation problem, ensuring a long life of LCBs for practical aspects.

## Lead Carbon Energy Storage Project
