Which APC UPS battery backup surge protector is right for You?

For those seeking a budget-friendly option, the APC UPS Battery Backup Surge Protector BE425M offers fantastic value without compromising on essential features. With a 425VA/225W capacity, it provides enough power to safely shut down computers and small electronics during outages.

What is a standby UPS?

A Standby UPS is a battery backup system where the battery is charged by the main power supply and connected to an inverter through a transfer switch. As shown in the block diagram of Figure 1, during normal operation, the system runs on primary power while the inverter remains inactive.

How does an ups work?

A UPS stores energy in internal batteries and converts it into AC power the moment your main power fails. Depending on the model, it might activate instantly (standby UPS), regulate voltage continuously (line-interactive), or offer full isolation from the power grid by double-converting energy (online UPS).
