

Lifepo4 power station factory in Guyana

Overview

What is a LiFePO4 power station?

A LiFePO4 power station is a type of portable power station that uses lithium iron phosphate (LiFePO4) batteries. These power stations are ideal for certain environments, particularly hot areas, due to their stable chemistry. The most popular brand using LiFePO4 batteries is Bluetti.

What are the best portable power stations?

Power everything from campsites to field work to essential circuits in the home during an outage. Introducing our newest generation of compact portable power stations, the Yeti 300, 500, and 700! These power stations were designed especially for outdoor adventures. They're versatile and rugged so you can use them at home and away.

What is the John Fernandes Wharf Power System?

The system arrived at the John Fernandes Wharf in Georgetown in 22 containers and will serve as the facility's emergency support in the event of turbine failure. It comprises battery racks, six inverters, auxiliary transformers, and a fully integrated power distribution center (PDC) shelter.

Why should you buy a portable power station?

They're versatile and rugged so you can use them at home and away. This portable power station is versatile enough to help out during a power outage at home and tough enough to handle mud, dirt, dust, water, and more. It has an IPX4 outdoor rating and is water resistant and dustproof.
