

London solar Panel Project

Overview

Are solar panels a game changer for London Stadium?

Mete Coban, Deputy Mayor for Environment and Energy said: “These solar panels are a game changer for the London Stadium, turning it into one of the world’s greenest sports and concert venues and hugely reducing its energy use and running costs.

Which London schools have solar panels installed in 2024?

In summer 2024, with the support of the London Mayor’s Greener Schools initiative, CEN installed solar panels on two local schools: Godwin Junior School and St. Stephen’s Primary School. The co-operative is part of Repowering London’s new Repowered Community initiative which (alongside key partners) aims to bring green energy reform to the borough.

Can London get more solar?

The Mayor’s Solar Action Plan sets out how City Hall programmes are expected to more than double London’s current solar energy capacity. But the Mayor thinks London can, and should, go further than this and wants to provide support to local government, businesses and others to install more solar in London.

What is the London solar opportunity map?

The London Solar Opportunity Map is based on the interpretation of LiDAR data (where laser technology is used to measure distances) collected and made available by the Environment Agency. It provides an initial estimate of the amount of electricity that could be generated from panels both on rooftops and at ground level.
