

Low-pressure photovoltaic energy storage container for Jordanian oil refinery

Overview

Oil shale (OS) can significantly enhance energy security and diversify the energy mix in countries like Jordan. However, OS extraction and utilization are always associated with negative environmental impacts.

Can a TRNSYS solar heating system be used in a refinery?

Using TRNSYS software, the proposed Parabolic Trough Collector (PTC)-based solar heating system paired with the boiler is modelled. Sensible thermal energy storage (TES) system is integrated into the refinery's process heating to handle the intermittent nature of solar energy.

Can solar energy systems decarbonize oil refineries?

Other studies in the literature considered coupling solar energy systems to oil refineries to decarbonize their operation. The applicability and feasibility of introducing a concentrated solar power (CSP) system to reduce partial reliance on process heaters of a crude oil refinery was studied by Danish et al.

Can solar energy drive crude oil refineries?

Employing solar energy to drive crude oil refineries is one of the investigated pathways for using renewable energy sources to support lowering the carbon emissions and environmental impact of operating the processing of fossil-based fuels.

Can a hybrid solar heating system be integrated with a storage tank?

Conclusion perature of heavy crude oil products before despatching from storage tanks. Due to the intermittent behaviour of solar energy, the solar hybrid system is integrated with a sensible heat storage tank. The suggested hybrid solar heating system for the renery was simulated using TRNSYS software, followed by experimental validation.

Low-pressure photovoltaic energy storage container for Jordanian o

[Analysis of a Solar-Assisted Crude Oil Refinery System](#)

Jun 6, 2024 · With the growing urge to decarbonize the energy sector, actions toward reducing emissions of the oil and gas sector can contribute to bringing large cuts to carbon emissions. ...

Enhancing energy sustainability: integrating concentrated ...

Feb 23, 2025 · The study examines Jordan's proficiency in deep oil shale retorting utilizing Shell's in-situ conversion process and determines the energy requirements for heating deep oil shale ...

[Solar-assisted hybrid oil heating system for ...](#)

Jul 16, 2023 · Sensible thermal energy storage (TES) system is integrated into the refinery's process heating to handle the intermittent nature of ...

Enhancing energy sustainability: integrating concentrated ...

Feb 19, 2025 · This paper presents an experimental and modelling analysis of the integration of a concentrated solar power (CSP) plant into oil shale extraction in Jordan. The

study examines ...

The study provides a study on energy storage technologies for photovoltaic and wind systems in response to the growing demand for low-carbon transportation. Energy storage systems ...

Jordanian Engineer Honored for Groundbreaking Smart Energy Storage ...

Oct 21, 2025 · Amman, May 22 (Petra) - A Jordanian engineer's innovative smart energy storage system, designed for industrial use, has earned regional acclaim, promising significant energy ...

[Unlocking Jordan's Renewable Energy Storage Potential](#)

Aug 25, 2025 · Hybrid Solar-Geothermal Heat Pump Systems: Simulated for various Jordanian locations, these systems incorporate storage to optimize energy use, offering a model for ...

Solar-assisted hybrid oil heating system for heavy refinery ...

Sep 1, 2023 · The present study investigates the feasibility of solar hybrid system to generate steam in the oil refinery to maintain the temperature of heavy crude oil products before ...

Solar-assisted hybrid oil heating system for heavy refinery product storage

Jul 16, 2023 · Sensible thermal energy storage (TES) system is integrated into the refinery's process heating to handle the intermittent nature of solar energy.

[Towards sustainable shale oil recovery in Jordan: An ...](#)

Nov 1, 2023 · The study recommends the use of PV with GB as the most economically viable option, while PV with batteries is the more eco-friendly choice for extracting shale oil from the ...

Refining

Boilers system in offsite units produces high pressure steam that is used in special turbines to generate electrical energy for electrical motors in the process units. There is an electrical ...
