

Maseru exports lithium batteries for power tools

Overview

How Lithium-ion batteries dominated the power tools market?

Lithium-ion batteries for power tools dominated the market, owing to the increasing demand from the automotive industry. The rising demand for fastening tools and the evolution of smart and connected power tools in the energy and automotive sectors are expected to provide immense opportunities for the market.

Which countries have the largest trade surplus in lithium ion batteries?

China had the largest trade surplus in the lithium ion battery exports sector, underscoring its significant competitive advantage in this market. The following countries experienced the highest net import deficits for lithium ion batteries in 2022.

How much do lithium ion batteries exports cost?

The overall value of lithium ion batteries exports increased by an average 31.7% for all exporting countries from five years earlier in 2020 when lithium ion batteries shipments were valued at \$2.71 billion. Year over year, revenues from exported lithium ion batteries accelerated by 52.4% compared to \$3.5 billion during 2023.

Which region will dominate the power tool batteries market?

Therefore, North America is expected to be the dominant region in the power tool batteries market during the forecast period, supported by increasing adoption in numerous end-user applications. The power tool batteries market is fragmented.
