

Moldova Grid-connected Solar Power Generation System Agent

Overview

Does Moldova have a power grid?

Moldova's electricity grid was predominantly built in the time of the Soviet Union, making it relatively old and inefficient. It is synchronously interconnected with Ukraine's Integrated Power System (IPS) and, in turn, Russia's Unified Power System (UPS) in the northern and south-eastern parts of the grid.

What is the electricity system like in Moldova?

The electricity system in Moldova is characterised by its reliance on imports. In 2020, of its 4.4 TWh of electricity demand, 81% was supplied by imports, either from Ukraine (4%) or from the Cuciurgani-Moldavskaya GRES (MGRES) gas-fired power plant (77%) located in the breakaway region of Transnistria.

How many MW of wind and solar energy is installed in Moldova?

, deployment of wind and solar energy in Moldova has been very slow. As of 2022, only 97.9 MW of renewable capacity for electricity generation was installed. Figure 1. Installed electricity generation capacity by type. 4 MW / 13% Non-renewable: 441.4 MW / 79% Renewable Energy Potential The Republic of Moldova features great potential.

How much energy does Moldova need in 2023?

This means that in summer CHPs are off, and the imports from Transnistria meet about 90% of the total domestic electricity demand. Committed renewable energy capacity in the Republic of Moldova by 2030 is expected to reach 700 MW. In 2023, renewable energy generation met 10.5% of the energy demand, compared to 5.5% in 2022.
