

Montevideo outdoor communication power supply BESS 24 hours door-to-door service

Overview

Why do we need a Bess system?

Battery Energy Storage Systems (BESS) are crucial for participating in Demand Response initiatives and supporting microgrids. They provide the necessary energy storage capacity to maintain operations independently from the main grid.

What is a Bess battery?

The small BESS series is a fully integrated battery energy storage system that's built to last. The Series is both scalable and engineered for modularity with a low MTTR, making it ideal for medium renewable energy projects. It offers flexible and scalable designs for various applications, whether you need a small or medium energy storage solution.

Why should you choose a Bess energy storage system?

It offers flexible and scalable designs for various applications, whether you need a small or medium energy storage solution. Our BESS is modular, which means you can mix and match cabinets to suit your system requirements. Plus, it comes in two variants, AC Single Bay and AC Dual Bay.

What makes Bess products unique?

Each of our BESS products is designed to be modular, scalable, and fully integrated, with a low Mean Time to Repair (MTTR) for medium to large-scale projects. They're made with readily accessible components, N+1 redundancy, and hot-swappable products, ensuring easy onsite servicing and maintenance.
