

Morocco exports solar containers

Overview

Why is Morocco a major exporter of solar energy?

Morocco, home to the world-renowned Noor Ouarzazate Solar Complex, has become a major exporter of solar energy expertise. The Noor project is one of the biggest concentrated solar power (CSP) plants in the world, which produces excess electricity that Morocco sells to Europe through connections with Spain.

Why should Morocco invest in solar energy?

With strategic investment in solar infrastructure, Morocco is poised to realise its full potential, accelerate its energy transition, and foster long-term sustainable growth.” Morocco is committed to expanding its renewable energy capacity, aiming to reach at least a 52% share of its total electricity capacity by 2030.

How much solar power does Morocco have?

Morocco has an average solar potential of five kilowatt hours (kWh) per square meter per day, although this varies geographically. Total installed capacity from solar energy currently stands at 831 MW. According to the Ministry of Energy Transition, and Sustainable Development, Morocco could potentially generate 25,000 MW of wind power.

What is Morocco's solar investment opportunities report?

The ‘Morocco: Solar investment opportunities’ report provides an overview of Morocco’s business environment, and major macroeconomic trends, while analysing the regulatory framework and infrastructure network of the country.
