

# Mozambique Energy Storage Liquid Cooling

## Overview

---

When will domestic gas be available in Mozambique?

Domestic gas from the Northern coast of Mozambique is expected to be available by 2026. The pressing challenge for Mozambique's energy authorities is to ensure that the entire population gets affordable and uninterrupted access to electricity over the next decade.

What is the optimal power system expansion plan for Mozambique?

The optimal power system expansion plan if wind and solar capacity are allowed to triple to reach almost 3 GW by 2032. Currently, the power system of Mozambique is separated into two transmission networks isolated from one another: the Central-Northern and Southern systems. Over 50% of the annual power demand is seen in the Southern system.

How can Mozambique achieve its electrification goal?

A power mix that takes advantage of its vast energy resources in a cost-effective way and provides a solid foundation for the long-term development of its power system. The use of proven power generation technologies coupled with a well-structured and realistic data-driven plan will enable Mozambique to reach its electrification goal.

How much gas will Mozambique need in 2024?

In addition to the planned generation capacity that is likely to be commissioned by 2024, the modelling results indicate that Mozambique will need 1.5 GW of new base load gas projects and 230 MW of new flexible gas projects from 2025 to 2032.
