

N-type monocrystalline bifacial double-glass module

Overview

Who makes 182 N type bifacial double glass module series?

182 N type Bifacial Double Glass Module Series offered by China manufacturer ZNSHINE PV-TECH Co.,Ltd. Buy 182 N type Bifacial Double Glass Module Series directly with low price and high quality.

Which bifacial double glass module produces more energy?

The bifacial double glass module produces more energy. Our N-type models have superior bifaciality. This means that the rear side of the module can produce up to 85% of the energy generated by the front side. Thus, the panel generates more energy overall. Lower degradation means a higher return on investment.

What is a medium-format n-type module?

The medium-format n -type series modules adopt 210R rectangular silicon wafer design. 210R technology not only breaks through the conventional medium-sized module power output bottleneck of 600W but also optimizes system performance. The bifacial double glass module produces more energy. Our N-type models have superior bifaciality.

What is a trinapro bifacial vertex module?

The TrinaPro utility solution utilizes our bifacial Vertex Modules to optimize performance and ensure system safety and reliability, boosting performance by 3-8%. Faster ROI, meaning higher efficiency, as well as lower degradation, more yield. Back-side power gains included with Trina's extended 30-year warranty.
