

Nauru container ship generator manufacturer

Overview

The vessel has been retrofitted with a 4.5MW medium-voltage shaft-driven power generation system, which is the most powerful system in the global ship retrofit market and is entirely owned by SMDERI. What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What is jet power supply container type generator set?

Jet power supply container type generator set is design in accordance with ISO/TC104 standard size, rational construction, to make sure the generator set will not be damaged due to under high pressure in transport, and is suitable for ship transportation. We can supply the 20' container, 40' container, and widen or heighten container type.

What makes our compact marine generators for boats different?

Our compact marine generators for boats are assembled with high quality motors and alternators from the leading brands on the market and are specific for marine applications. In addition, the soundproofed cabins that we design offer a key difference from the current market offer.

Why do you need a marine generator set?

From providing marine generator sets for ships and vessels to the installation of power generation systems in off-shore applications, our R&D+i capacity allows us to develop our own technology to offer top-level solutions in all our projects around the world, no matter the scale. Our marine generator sets can be used both in port and offshore.
