

# **New Energy Battery Factory Container Base Station**

## Overview

---

Where is the containerized battery energy storage system manufactured?

The containerized battery energy storage system has been manufactured in Odense, Denmark by the system integrator and turnkey supplier Trident Maritime Systems. The battery system will be shortly transported to Singapore and installed on board the Maersk Cape Town.

Where is China's largest battery base?

A new production base for energy storage and power batteries in Yanzhou district of Jining, Shandong province, recently went into operation, making it CATL's first in northern China and currently the largest battery base in the country in terms of planned capacity, according to a statement from the company on Saturday.

How big a battery production base is being built?

The battery production base is being built in three phases, with the first phase of the project, which is in operation, having a scale of 60 GWh, according to CATL. The first phase of the project covers an area of 530,000 square meters, with a total construction area of 520,000 square meters, including factory buildings and living facilities.

What is CIMC Yangzhou base battery swapping station/new energy vehicle containerized power station?

CIMC Yangzhou Base Battery Swapping Station/New Energy Vehicle Containerized Power Station consists of several container modules, suitable with various brand new energy cars and battery systems, integrated with battery storage, battery charging, car moving, and internet communication system.

## New Energy Battery Factory Container Base Station
