

New solar container energy storage system Project

Overview

Singapore-based renewables developer Vena Energy has broken ground on a 408 MWh battery energy storage system that is being built alongside an existing 182 MW of solar generation and a 41.5 MWh battery at Tailem Bend in South Australia. What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.

How much energy does a liquid cooled container hold?

The latest generation product has an energy density of more than 440 Wh/l, a roundtrip efficiency of 96%, and a cycle lifetime of nearly 16,000 charge-discharge cycles. The liquid-cooled system has a voltage range from 1500 V - 2000 V and is configurable for storage durations of two to eight hours. The container weighs around 55 tons.

What is AI-powered energy storage & X?

At the EESA show, the company also launched its AI-powered "energy storage + X" solution for grid-scale battery storage systems capable of facilitating sizing and construction of projects as well as their operation, specifically their lifecycle services and trading in the electricity spot market.
